PRIMARY SKILLS

Python   C#   SQL   Git   JavaScript   TypeScript   ReactJS/NextJS   HTML/CSS

Leadership   Mentoring

HIGHLIGHTS

FLAT ROCK TECHNOLOGY TEAM LEAD

Jan 2024 - Present

PROJECTS:

The company provides eCommerce enablement and analytics software for multichannel brands to convert global customers. With us, brands can enable commerce in the places where their shoppers spend time and measure the omnichannel outcome of those interactions.

- Creating different types of scraping scripts using our internal tool called Minotaur

RESPONSIBILITIES:

- Ensuring seamless client communication.
- Task Management: Sprint planning, backlog grooming, and allocating tasks to team members.
- Monitoring Progress and Deliverables: Ensuring tasks are completed on time and to the quality expected, making adjustments as needed.
- Code Review: Conducting code reviews to maintain coding standards, ensuring best practices, and providing feedback to team members.
- Mentorship and Skill Development: Mentoring junior team members and helping in their technical skill enhancement.
- Conflict Resolution and Problem-Solving: Identifying and addressing blockers or conflicts to keep projects on track.
- Feedback and Performance Reviews: Providing constructive feedback and conducting performance evaluations for team members.

TECHNOLOGIES USED:

C#   ElasticSearch   HtmlAgilityPack   Puppeteer

ScrapySharp   RESTful   Minotaur(Internal tool)   Jira   Notion

SKILLS DEVELOPED:

Leadership   Time Management   Decision-Making   Delegation

Mentoring   Conflict Resolution   Problem-Solving

EXPERIENCE

FLAT ROCK TECHNOLOGY

- Team Lead
  Jan 2024 - Present

- C# Developer
  Mar 2021 - Jan 2024

- Java Developer
  Jun 2016 - Mar 2021

ARDES.BG

Sales Consultant
Jun 2015 - Jun 2016

ASIC DEPOT

Intern
Jun 2014 - Jul 2014

EDUCATION

Bachelor degree,
Computer systems and technologies
Technical University of Varna
2011-2015

CERTIFICATES

FLAT ROCK TECHNOLOGY C# DEVELOPER

Jul 2016 - Dec 2023

PROJECT:

The company provides eCommerce enablement and analytics software for multichannel brands to convert global customers. With us, brands can enable commerce in the places where their shoppers spend time and measure the omnichannel outcome of those interactions.

- Creating different types of scraping scripts using our internal tool called Minotaur

RESPONSIBILITIES:

- Creating and maintaining variaty of scraping scripts
- API Interaction: Working with RESTful APIs for structured data extraction.
- HTML and XML Parsing: Proficiency in parsing HTML/XML
- JSON and Data Formatting: Handling JSON data formats
- Regular Expressions (Regex): Using regex for efficient pattern matching and text extraction.
- Exception Handling: Effective use of error handling techniques to manage network issues, CAPTCHA challenges, and other interruptions.

TECHNOLOGIES USED:

| C# | ElasticSearch | HtmlAgilityPack | Puppeteer |

| ScrapySharp | RESTful | Regex | Minotaur(Internal tool) | Jira |

| Notion |

SKILLS DEVELOPED:

| Problem-Solving | Decision-Making | Time Management |

| Mentoring | Self-learning | Teamwork | Communication |

PERSONAL PROJECTS

COIN TRACKER PROJECT

PROJECT SUMMARY:

The cryptocurrency tracking website was developed using ReactJS for creating a dynamic and responsive user interface, leveraging JavaScript for interactivity and logic. CSS was utilized to style the application, ensuring a visually appealing design. To manage global state efficiently, the project implemented React Context. React Router was used for seamless navigation and routing between pages. ChartJS was integrated to display cryptocurrency data in visually compelling charts. For form handling, the project used react-hook-form, ensuring a smooth user experience, combined with Zod for robust schema validation. Additionally, react-number-format was employed to format numerical data like cryptocurrency prices and values, enhancing readability.

FEATURES:

- Explore available Cryptocurrencies: View a list of cryptocurrencies, access detailed information such as current price and market cap, and stay updated with real-time market data.
- User Acount Capabilities: Register/Login to unlock additional features like the portfolio tracker.
- Add Transactions to your personal portfolio: Log new transactions by specifying the cryptocurrency, transaction type (buy/sell), quantity, and
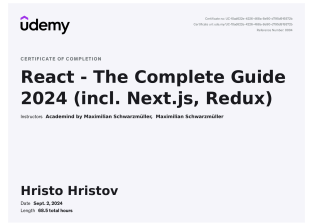

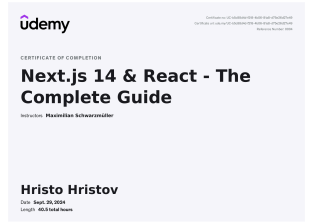

notes.
- Portfolio Tracker: Access a summary of your transaction history with options to edit or delete transactions.

TECHNOLOGIES USED:

| ReactJs | HTML/CSS | JS | React Context | React Router |

| ChartJS | React Hook Form | Zod |

PERSONAL FINANCE TRACKER
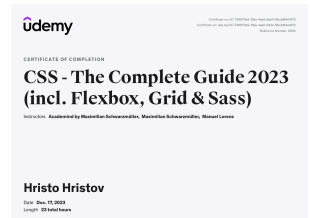

PROJECT SUMMARY:

Finance Tracker CLI is a simple command-line application that allows you to track your income and expenses. The application reads and writes transaction data to a CSV file, provides summaries over specified date ranges, and offers visualization of your data with plots.

FEATURES:
- Add new transactions
- View transactions and summary within a date range
- Visualize a plot within the given date range

TECHNOLOGIES USED:

| Python | pandas | matplotlib | OOP |

Css - The Complete Guide

Issued by Udemy (Dec 2023)
